Nice story. You forgot to mention that your assertion of inventing "EMAIL" is not backed by historians since someone else had already come up with an electronic mail system which had been in use for years.

Patenting something called "PLANE" wouldn't make you Wilbur Wright.

WhiteOnRiceAnon @WhiteOnRice... Replying to @RickCainHaole and

If you want the most egregious undeniable evidence that authorities go to great lengths to cover up the harms the vaccines cause to babies, then look no further than Wyeth internal correspondence document from 1979.

To summarize, there were an inordinate amount of sudden infant death cases in Tennessee post DTP vaccine, and instead of removing the vaccine from the market, changing the formulation, ensuring quality control was good, or doing further studies on it's safety, they instead came up with "interim and permanent measures" to cover it up.

To hide the connection between the vaccines and SIDS, Wyeth changed their policy on how vaccine lots are distributed to practices for administration. Instead of just shipping off each lot that were all manufactured together, they started splitting up the lots and sending them all over the country so it was more difficult to make connections between vaccination

Post your reply

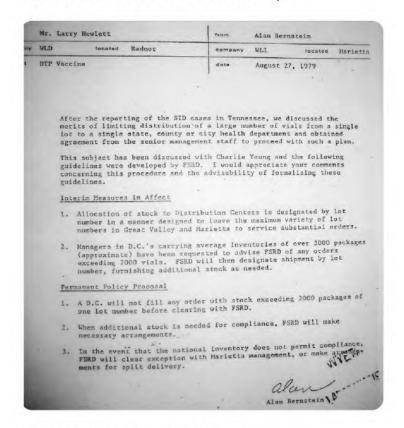

← Post

Pharmaceutical companies still use this practice today, but with even more sophistication and data analytics to ensure all tracks are covered up.

	Mr. Larry Hewlett	tram	Alan Bernstein		
пу	WLD tocated Radnor	company	WLI	located	Marietta
	DTP Vaccine	date	August 27,	1979	

After the reporting of the SID cases in Tennessee, we discussed the merits of limiting distribution of a large number of vials from a single lot to a single state, county or city health department and obtained agreement from the senior management staff to proceed with such a plan.

This subject has been discussed with Charlie Young and the following guidelines were developed by FSRD. I would appreciate your comments concerning this procedure and the advisability of formalizing these guidelines.

Interim Measures in Affect

- Allocation of stock to Distribution Centers is designated by lot number in a manner designed to leave the maximum variety of lot numbers in Great Valley and Marietta to service substantial orders.
- Managers in D.C.'s carrying average inventories of over 3000 packages (approximate) have been requested to advise FSRD of any orders exceeding 2000 visls. FSRD will then designate shipment by lot number, furnishing additional stock as needed.

Permanent Policy Proposal

- A D.C. will not fill any order with stock exceeding 2000 packages of one lot number before clearing with FSRD.
- When additional stock is needed for compliance, FSRD will make necessary arrangements.
- In the event that the national inventory does not permit compliance, FSRD will clear exception with Marietta management, or make arounderments for split delivery.

a mice New posts Ilebay

Noticing the discussion with Doyin, llebaye accuses them of trying to ruin her friendship. Ceec, in turn, let her know all they were discussing and the fact that she was at fault. Their heated exchange led to Ilebaye pulling Ceec's face and almost getting into a physical altercation. It took Angel, Alex, and Seyi's interruption to help the duo calm down. llebaye also exchanged words with Princess, who teased her, and Doyin, who she grabbed by the neck when Biggie summoned her.

To ramp up the Covid-19 vaccination drive, the Health Department has already given daily and weekly targets of vaccine shots to each district. Henceforth, the health authorities in Patiala will have to inoculate 16,714 beneficiaries in a day and 1.17 lakh

irra week.

To achieve target the Health Department has already decided to give Rs10 to each ASHA worker for bringing one beneficiary for the vaccination.

The aim of giving monetary benefit, health officials said, was to motivate ASHA workers so that they could convince beneficiaries for getting jabbed against Covid-19.

It has been learnt that even smallest health centre has to inoculate at least 1,000 beneficiaries. However, experts said

Did you file cases against government for giving 20 rs to the asha workers to coerce people for vaccination?

have blocked critical pathways that are needed for the body to be able to detox and function properly, methylation cycle being a big part of that since he has a homozygous MTHFR variant."

"For 2.5 years we have not been able to stop his seizures, which he has daily anywhere from 15-20+. We have tried all seizure meds, with some improvement from CBD oil. Using a genetic test that looks at genetic variants (SNPs), I was able to get the big picture on how to support his body and allow it to heal on its own. Gavin has been seizure free for the first time in 2.5 years. His continuous 24 hour EEG confirmed it!"

"We are hoping and praying that the new supplements controlling his seizures also halt his brain atrophy and help him regain some of his function. We have no doubt that if Gavin had started this regiment from day 1 of his injury, he would have fully recovered. We pray that it is not too late to get him back. We are also hopeful that everything we have learned through Gavin can help save other lives."

The irony is that Covid doesn't do this, but the Covid 'vaccines' do.

And yet they used this propaganda to scare people into getting injected.

Soros arbitraged politics. He figured out that spending small amounts of money in many obscure, but influential, races is far more effective than money spent on major contests.

The mistake people make is thinking that he did it for the good of humanity. He hates humanity.
